| 10:00 am | **A gendered perspective of the recovery from COVID-19: An agenda for trade unions**  
*Sandra Massiah, SRS; Tiftonie Williams (JCSA)*  
At the 109th ILC in 2021 member states, employers and workers adopted a **Global Call to Action for a human-centred recovery from the COVID-19 crisis that is inclusive, sustainable and resilient**. So far, the actions taken by various governments (including those in the Caribbean) do not appear to be “inclusive, sustainable and resilient.” The session sets the stage for the discussions at the 2022 SUBWOC, focusing on the need for gender responsive approaches. The meeting provides the space for SUBWOC representatives to think about and identify strategic actions in their unions. Some critical questions:  
- What is the trade union agenda for the ‘recovery’?  
- What part are trade unions currently playing?  
- Are trade unions still pushing for a new Social Contract?  
- Where is the gendered perspective?  
*Resolution concerning a global call to action for a human-centred recovery from the COVID-19 crisis that is inclusive, sustainable and resilient.*  
*ILO’s Centenary Declaration for the Future of Work.*  
*A new social contract for a gender transformative agenda.* |                                            |
<p>| 10:30 am | <strong>BREAK</strong>                                                                                       |                                            |</p>
